Education

2019 - 2023

BSc. Computer Science

Addis Ababa University

Expertise

- Flutter
- MERN Stack
- C++
- Github
- Video Editing

Language

English

Amharic

Abdelselam Kemal

Full-Stack Developer

I am a computer programmer, mobile app developer, and part-time video editor. Notably, I have successfully developed an Android app for a Telegram channel, showcasing my proficiency in creating user-friendly and feature-rich mobile applications. Additionally, I have actively contributed to numerous other projects, honing my skills and expanding my expertise.

WORK EXPERIENCE

March 2023

Bytefarm | Addis Ababa

Lead MOBILE APP DEVELOPER(Flutter)

During the time I worked at Bytefarm, a software development company, I served as the Lead Flutter Mobile Developer for the esteemed project, WalletX. Over a span of three months, I made significant contributions to the development of the project. With my expertise in Flutter, I played a pivotal role in designing and implementing innovative mobile app solutions, resulting in a seamless and user-friendly digital wallet experience.

March 2021 - July 2022 Individual | Addis Ababa

MOBILE APP DEVELOPER

Using the Flutter framework, I developed an Android application for a telegram channel called Ye-Elm-Kazna. This channel serves as an invaluable resource, offering a diverse range of educational materials focused on Islamic knowledge to its dedicated followers.

PROJECTS

Pello | Mobile App Developer

Pello was a hackathon project I developed using Flutter and Firebase. The project achieved 4th place in the hackathon competition. Pello: Pello World is a platform designed to facilitate technology students' access to modules, learning materials, and project samples effortlessly.

MyWeather | Full-Stack Developer

I developed a Node.js application called 'myCloud' that implements a matrix-based approach to help users find local weather conditions. Through this project, I fully contributed to the design and implementation of the system, enhancing its functionality and performance. Users can effortlessly access weather and other pertinent information by entering their location.

WTMS | Front-End Developer

"In my university's final project, I stood out in the role of a front-end developer for a Woreda Management System. By utilizing React, Next.js, and Node.js, I crafted intricate user interfaces that significantly enhanced the system's visual appeal and user-friendliness.

INTERNSHIPS AND HACKATHON

HACKATHON

Jan 2022 - Present | Addis Ababa

I completed a six-week IcoGmakers software development training program and I have participated on the Hackathon program using my project PELLO. I placed fourth out of nine candidate groups and received positive feedback from my mentors.

SIDEHUSTLE INTERNSHIP

Jun 2022 - Aug 2023 | Remote

I have finished a six-week React and Node.js internship with SideHustle
